

May 10 2007 • 8:30_{AM}-11:30_{AM}

In conjunction with ISEE 2007 and Electronics Recycling SUMMIT® at the Caribe Royale Hotel, Orlando Florida, room Boca III, you are invited to take part in a comprehensive hands-on electronics recycling simulation that replicates all facets of two state-mandated recycling systems currently in use.

Using role-playing and scale versions of the various materials, participants will have the opportunity to compare the logistical, administrative, and financial aspects of recycling programs underway in California and Maine for large electronic materials including televisions and computer monitors.

Learn how laws passed in these states have been put into practice and how each stakeholder in the process – consumers, recyclers, producers, retailers, and administrators – carry out their respective roles.

Acquire a year of real-world experience in just three hours.

If you would like to register for the Electronics Recycling Simulation please fill out the form below and send it to Tom Sipher, PO Box 1976, Indianapolis IN 46206-1976, or email Tom at tom.sipher@thomson.net
